Comments:

No meeting/conference call on 10/11. Guardian had a Front-End loader delivered to the site and began using it on Tuesday 10/16, the Front-Loader should increase the amount of soil processed at the Hydro-Aeration station and by the phase 2 excavation team by halving the distance traveled to and from the excavation to the soil staging area, and to and from the soil staging area to the Hydro-aeration station by the Backhoe and the Front-Loader itself.
